

Day 04 – Java IO and Arrays

Interactive Java Compiler, JShell (nice for trying something quick, would still need to translate into Eclipse Java Project), <https://onecompiler.com/jshell>

Java I/O on a line:

- `hasNext()` and `next()`,

<https://docs.oracle.com/javase/8/docs/api/java/util/Iterator.html>

- Eclipse bug

Note that you should be able to merely terminate the end of input in the Eclipse console window with `^D` (Mac OS) or `^Z` (Windows), but this doesn't always work. Here's some discussion of the problem and a workaround:

<https://stackoverflow.com/questions/5494958/sendan-eof-in-eclipses-debugger-console>

Java Arrays

Lab 02
