Day 08b – Intro to Cascading Style Sheets (CSS)

1. Just a reminder, when you save your pages make sure they are text, but that they have the `.html` extension and not `.txt`. As you modify your pages to add functionality, be sure to save separate copies.
2. On three different webpages, using the "View Source" option, look for:
   a. `css`
   b. `<style>`
   c. `Stylesheet`
3. General observations on what you saw.
4. Now, go to www.juniata.edu and pick the "Academic Home."
5. Go to three of the tabs on the left ribbon, and look for similarities, with OUT looking at the page source.
6. Who are the users of the Juniata web-pages:
   a. Prospective students.
   b. Current students.
   c. Those seeking employment.
   d. Parents/Family.
   e. Alumni.
   f. Faculty and Staff.
7. It's difficult to design a website with so many different constituents.
8. What are the advantages to having similarities:
   a. Easier to navigate.
   b. Conveys formality and intention in design and implementation.
   c. Contributes to branding.
9. Now, look at the page source and try to understand how the similar design elements are reflected in the page source.
